Baltimore, MD 21230-1719

Re: Gude Landfill – Assessment of Corrective Measures (ACM) Report

Dear Ms. Hynson:

Please find enclosed for your review and approval the Gude Landfill Assessment of Corrective Measures (ACM) Report prepared in accordance with the schedule and requirements of the Consent Order between Montgomery County, Maryland and the Maryland Department of the Environment executed in May 2013, MDE Case No. CO-11-SW-036. Per the request of your staff, we are providing one hard copy and one electronic copy of the report.

The report was prepared for Montgomery County by EA Engineering, Science and Technology, working closely with Montgomery County Department of Environmental Protection (DEP) and the Gude Landfill Concerned Citizens (GLCC). In selecting the remediation approach recommended in the report, County Executive Leggett first met with representatives from the GLCC, who expressed their support for this approach, and then sent his recommendation to the County Council for review. The recommended remediation approach includes enhanced bioremediation, additional gas extraction wells and cover system improvements. We look forward to meeting with you and your staff, after you have had time to review the document, so we can address any questions and move forward as appropriate.

Please contact me at 240-777-6569, or at peter.karasik@montgomerycountymd.gov, or Jamie Foster at 240-777-6564, or at jamie.foster@montgomerycountymd.gov, if you have any questions or comments during the review process.

Received by: MDE
